

Map and directions to birth

Please draw a map to the location of the birth (most likely your house) as best you can. Please include road names, major or minor landmarks, the estimated number of miles or amount of time per each section of the road, and other pertinent information. Keep in mind that we might be trying to locate your house in the night! It may also be necessary, though the likelihood is small, that an ambulance may need to make the trip too. Please fill this out, photocopy it, give one copy to us, and place the other next to the phone at your house.

Address, City: _____

Phone numbers: _____
